***MAZDA TO MAKE THREE***  
***2010 MODEL YEAR DEBUTS AT 2009***  
***NEW YORK INTERNATIONAL AUTO SHOW***

(Richmond Hill, ON): Mazda North American Operations will unveil three new vehicles at the 2009 New York International Auto Show, including the heavily revised 2010 CX-9 and CX-7 crossover SUVs and the highly anticipated *MAZDASPEED3* high-performance compact 5-door. Takashi Yamanouchi, representative director, president and CEO, Mazda Motor Corporation, is scheduled to address the media at a press conference at the Mazda booth.

A strong success - including winning the 2008 *Motor Trend* Sport Utility of the Year and 2008 North American Truck of the Year awards - the CX-9 is a seven-passenger, three-row crossover SUV with unique driving dynamics that are not found in its segment. For the 2010 model year, the CX-9 receives an exterior and interior facelift, added options and reinforced safety features, while further improving *Zoom-Zoom* driving characteristics.

The 2010 *MAZDASPEED3* builds on the credentials of its predecessor, and remains one of the quickest and fastest front-wheel drive cars in the world. It blends five-door functionality with bolder, more aggressive styling and exhilarating performance to meet the needs of enthusiasts with active lifestyles. Carrying forward the MZR 2.3L direct injection turbo engine, the new *MAZDASPEED3* mixes world-class performance with Nagare (flow)-inspired design cues on the exterior and interior of the car. The *MAZDASPEED3* made its world debut at the Geneva Motor Show and is the third model in the 2010 MAZDA3 lineup, joining the MAZDA3 5-door and 4-door sedan.

The 2010 CX-7 receives an exterior and interior styling refresh as well as a host of safety, convenience and engineering refinements. Leading the way is a new engine option - an all-new naturally aspirated DOHC 16-valve 2.5 liter MZR four-cylinder, coupled to a five-speed automatic transmission. The familiar turbocharged 244-hp DOHC 16-valve MZR Direct Injection Spark Ignition (DISI) 2.3-liter four-cylinder will continued to be offered. The CX-7 made its world debut at the Canadian International Auto Show earlier this year.

The balance of Mazda's full lineup also will be on display at the show, including MAZDA6, MAZDA5, RX-8, and the all-new 2010 MAZDA3. The

New York International Auto Show is open to the public April 10-19, 2009, at the Jacob Javits Convention Center.
