2024 MAZDA CX-5

VEHICLE HIGHLIGHTS

The 2024 Mazda CX-5 receives some noteworthy enhancements that will keep accelerating the CX-series momentum, and will help to keep exceeding expectations in the growing Compact SUV segment. The Mazda CX-5 is known for its stylish design, refined driving dynamics, and upscale features. Some key highlights as follows:

Design

The Signature model exterior design changes are even more refined and sophisticated with an intricate block grille mesh pattern finished in gunmetal, front and rear lower bumper in body colour with silver accents, and exterior mirror caps with the same silver accent colour. In the interior, grey accents have been added to create a feeling of refined sportiness and youthfulness to the cabin space through contrast with the upholstery trimmed seats.

The GT model now also adopts the use of the colour matched exterior cladding previously deployed only on the Signature model, and also adds newly designed 19-inch wheels and finish to give an elegant impression. The interior is also enhanced with grey accents.

A new trim is introduced, Suna Edition, this vehicle complements the very successfully Sport Design trim, both offering a sense of sportiness blended with upscale styling. They both share gloss black exterior flourishes, like black metallic aluminum alloy wheels, side mirrors, and front grille, but with Suna Edition has its own unique color scheme to stand out from the crowd. This special model exclusively receives Zircon Sand Metallic exterior paint and an interior that features a blend of materials and colours, such as terracotta, black suede-like accents, and gunmetal accents to give these models a timeless feel that still appeals to the modern world. The Suna Edition only features Mazda's Skyactiv-G 2.5 Turbo engine paired with a six-speed automatic transmission and standard i-Activ AWD.

Dynamic enhancements

Further enhancements have been made to the CX-5 which already delivers outstanding handling, now with a more direct and swifter feeling.

- 1- Modified coil spring rates: with the front springs softer and the rear springs stiffer, it is easier for the vehicle to roll diagonally when entering a corner, and to transfer the load to the outside front wheel, which enhances turn-in feel and stability.
- 2- Modified front stabilizer bar: working in conjunction with the spring rate changes, the bushings that secure the stabilizer to the subframe are stiffened to ensure the outside front wheel will be held firmly to the road surface under diagonal roll and load, making it easier to transfer the load effectively to this wheel.
- 3- Cooperative control of i-Activ AWD and GVC (Turbo engine only): as with the Mazda3 and CX-30, cooperative control of i-Activ AWD and GVC works to suppress the increase in torque distribution to the rear wheels when the driver turns the steering wheel, effectively reducing understeer when entering a corner.

Infotainment enhancements

The infotainment system brings new enhancements that enable customers to enjoy a more seamless and pleasant driving experience. Details below by grade level:

2024 MAZDA CX-5

VEHICLE HIGHLIGHTS

DROPPED, MOVED, NEW FEATURES (NEW ARE DENOTED IN BOLD) VERSUS 2023 MAZDA CX-5**GX GRADE:**

- SKYACTIV-G 2.5 with Cylinder Deactivation and i-stop
- Standard Touchscreen centre display for Apple CarPlay™ / Android Auto™

GS GRADE:

- SKYACTIV-G 2.5 with Cylinder Deactivation and i-stop
- **Leatherette trim upholstery with grey interior stitching accent**
- Dual zone Automatic climate control (moved from GS with Comfort Package)
- Rear air vents (moved from GS with Comfort Package)

KURO EDITION:

- SKYACTIV-G 2.5 with Cylinder Deactivation and i-stop

GT GRADE:

- SKYACTIV-G 2.5 with Cylinder Deactivation and i-stop
- Wheel arch and rocker trim in body colour
- Front and rear lower bumper in body colour
- **19-inch alloy wheels (silver metallic) - new design and finish**
- **Black Leather-trimmed upholstery with dark grey stitching and piping**
- Grey interior stitching accent
- Rear armrest with 2 rear charging USB ports (Type-C)
- **Wireless Apple CarPlay™ integration**
- **Wireless Android Auto™ integration**
- Off-Road Navigation system

SPORT DESIGN:

- Dropped Sport Design model with SKYACTIV-G 2.5 with Cylinder Deactivation from the line-up
- **Piano black front grille**
- Rear armrest with 2 rear charging USB ports (Type-C)
- **Wireless Apple CarPlay™ integration**
- **Wireless Android Auto™ integration**
- Off-Road Navigation system

SUNA EDITION:

The Suna Edition is based off the Sport Design grade and includes unique features and equipment, such as:

- **Zircon Sand Metallic exterior colour**
- **Terracotta leather with black suede-like trimmed upholstery with Terracotta stitching and black piping**
- **Terracotta interior stitching accents**

SIGNATURE GRADE:

- **Gunmetal finish front grille**
- **19-inch alloy wheels (gunmetal) - new design and finish**
- **Exterior door mirrors in Silver**
- **Front and rear lower bumper in body colour with silver accents**
- **Grey interior stitching accent**

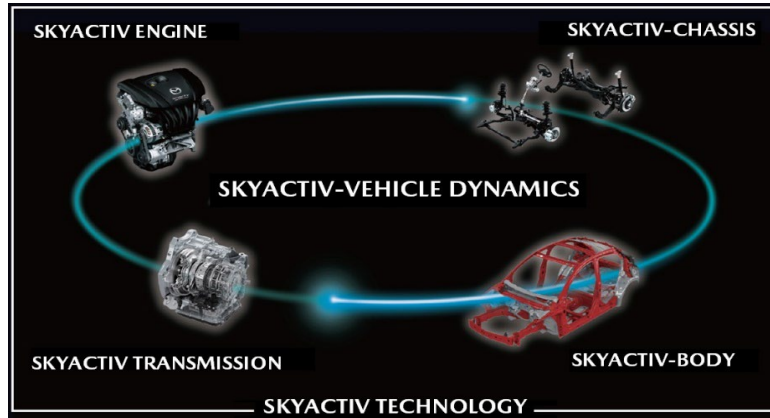

2024 MAZDA CX-5

VEHICLE HIGHLIGHTS

G-VECTERING CONTROL (GVC)

WHY**PROGRESSION OF THE JINBA-ITTAI PHILOSOPHY**

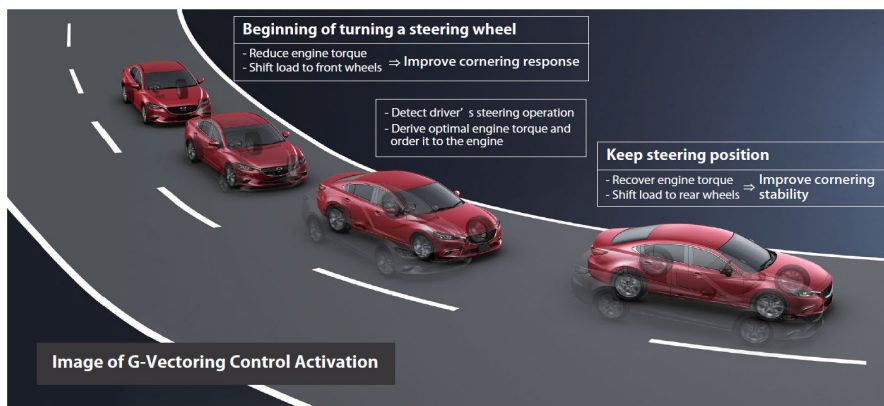

Mazda aims to offer vehicles that provide driving pleasure and enrich the lives of their owners. We have achieved this through the pursuit of Jinba-Ittai, a feeling of unity between driver and vehicle. GVC is the first technology within Skyactiv-Vehicle Dynamics, and is part of the Skyactiv series of technologies. Skyactiv-Vehicle Dynamics was conceived to integrate control of the engine, transmission, chassis and body to enhance the car's Jinba-Ittai feel; a sense of connectedness between car and driver that differentiates Mazda vehicles from others.

HOW**ENHANCING CHASSIS PERFORMANCE USING THE SKYACTIV ENGINE**

GVC is only possible thanks to the existence of Skyactiv engines, which enable precise control of drive torque, and the Skyactiv-Chassis, which facilitates ideal vehicle behavior. GVC maximizes tire performance by focusing on the vertical load on the tires. The moment the driver starts to turn the steering wheel, GVC controls engine drive torque to generate a deceleration G-force, thereby shifting load to the front wheels. This increases front-wheel tire grip, enhancing the vehicle's turn-in responsiveness.

Thereafter, when the driver maintains a constant steering angle, GVC immediately recovers engine drive torque, which transfers load to the rear wheels, enhancing vehicle stability.

This series of load transfers extracts much more grip from the front and rear tires, improving vehicle responsiveness and stability according to the driver's intentions.

**A NATURAL CONTROL EFFECT BASED ON A HUMAN-CENTERED DEVELOPMENT PHILOSOPHY**

Mazda studied the biomechanical relationship between the human and a vehicle in operation in order to tune the system to maximize a smooth interaction. The reaction rate and amount of control has been aligned with human sensibilities.

2024 MAZDA CX-5

VEHICLE HIGHLIGHTS

BENEFITS OF GVC

CONFIDENCE INCREASES AS THE CAR BEHAVES MORE IN LINE WITH DRIVER EXPECTATIONS

The driver operates the steering wheel to keep the vehicle within its lane whether driving in a straight line or cornering. However, due to irregularities and undulations in the road surface, the vehicle does not always travel along the expected line, forcing the driver to make corrections with the steering wheel.

Since GVC provides enhanced response to slight steering wheel operations, it greatly reduces the size and frequency of steering corrections.

Because GVC simultaneously enhances handling and stability by optimizing the vertical load on the tires depending on driving conditions, it demonstrates even greater effectiveness in rain and snow and on poor road surfaces.

GVC is also effective at reducing fatigue for both driver and passenger. Fatigue steadily builds up as the driver continues to make minor steering corrections. Since GVC helps alleviate these corrections, it reduces accumulated fatigue over long distances. And by smoothing the transitions between G forces, GVC suppresses the swaying of head and body experienced by vehicle occupants, enabling them to enjoy a more comfortable drive.

Reduction in torso-sway with GVC

* In-house passenger seat comparison of left-hand turn at 30 km/h (lateral acceleration of 0.4 G)

Moving forward, Mazda plans to deploy GVC in most of its new-generation vehicles.

G-VECTORING CONTROL PLUS (GVC PLUS)

Newly added to the smooth and efficient vehicle behaviour delivered by G-Vectoring Control (GVC) is braking control. This further improves vehicle behaviour for even easier control and greater reassurance when changing lanes on the highway, or maneuvering to avoid emergency situations or to counter slippery road conditions on snowy roads.

Applying just a hint of braking to the outer tires when returning the steering wheel to its neutral position while cornering increases the stability of the direction of yaw movement. Because the steering wheel angle is also reduced in the process, it helps maintain a stable vehicle posture for easier, more predictable handling in such situations.

The car leans very little and the steering wheel returns quickly for reassuring and predictable handling

The car leans more, causing worry, and the steering wheel angle is large, so handling is less predictable
